

Build It!

BUILT TO A-MAZE!

Materials: Blocks; blankets; chairs; books;
Make sure you have room to move!

Activity: Use blocks to design a model of a maze. You can make it as simple or as challenging as you like. Then use your design to build a life-size maze using items from around your house (think of building a fort, but it's a maze with wrong turns, dead ends, switchbacks and a single solution). Challenge your family to crawl through your fort to solve your maze.

GREAT EXPLORATIONS
