

Build It!

FLOATING BLOCKS!

Materials: Foam blocks or other flat objects that will float; a large bowl or bin 75% full of water.

Activity: Put the container of water on a flat surface that can get wet (or outside!). Place your blocks or other flat objects in the water and begin building in the water! How high of a tower can you build? What material do you like building with the most?

Please Note: This activity involves the use of water and your child may require adult supervision.
