

# DINO EGGS!

## **MATERIALS:**

**Ice tray**

**Small items**

**Water**

We're making ice/Dino-eggs!

Use things in your space like small toys, sparkles, ribbon, string, ect, and put them in the container/ice tray. You can even add a couple drops of food coloring.

Cover the things you collect in water, (like making ice) and put in the freezer until frozen. Once they're frozen, put the ice-di-no-eggs in a bowl or container. Use warm water and salt to try and free your toys and things from the ice!

Experiment using warm water versus cold water, salt versus no salt, etc!
